EDITORIAL POLICY

Operational Research (OR) involves the application of scientific methods to the management of complex systems of people, machinery, materials, money and information. It seeks to produce an understanding of managerial problems and to develop models which will enable the consequences of decisions to be investigated. OR methods have already had widespread application and success in many areas of business, industry and government, and their use is rapidly increasing in social systems and in the international arena.

The European Journal of Operational Research (EJOR) is intended to strengthen these advances by publishing high-quality, original papers that contribute to the practice of decision making, within and beyond Europe, irrespective of whether their content describes an application or a theoretical development. A special call is made for case study papers showing OR in action in firms and other organizations. Mathematical or computer-science contributions should be capable of being used in the foreseeable future.

EJOR has regular, special and feature issues. Every issue contains a leading invited review explaining the developments in an OR topic over the past five years to the general OR reader. In addition, EJOR includes (a) short communications, which may be letters or technical notes, (b) OR software news (c) reviews of books published within the previous year, (d) the bulletin of the Association of European Operational Research Societies (EURO bulletin). The language will be English and attention will be paid to the quality of presentation. However, EJOR actively seeks to publish papers from non-native English speakers and therefore provides free assistance with improvements to the English of otherwise acceptable papers.

Authors of articles within the scope of EJOR are invited to send three copies of their paper to any of the editors at the addresses above. All papers will be refereed and the intended refereeing time is seven weeks. See also the Instructions to Authors at the end of this issue.

Subscription Information. European Journal of Operational Research (ISSN 0377-2217) is sponsored by the Association of European Operational Research Societies within IFORS and is published in five volumes (15 issues) a year. The subscription price for 1987 (Volumes 28–32) is Dfl. 1075.00 + Dfl. 125.00 p.p.h. = Dfl. 1200.00. Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in the following countries where air delivery (S.A.L.—Surface Air Lifted) is ensured: Argentina, Australia, Brazil, Canada, China, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, Singapore, South Africa, South Korea, Taiwan, Thailand, U.S.A. For the rest of the world airmail charges are available upon request. Reduced rates for individuals are available under certain conditions; for more information write directly to the Publisher. Claims for missing issues will be honoured free of charge within three months after the publication date of the issues. Mail orders and inquiries to: Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, Netherlands. Technical Editor: Jaap Klouwen, ESP Information and Business, P.O. Box 1991, 1000 BZ Amsterdam, *tel.* 31-20-5862 493.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.
Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25. also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

ASSOCIATION OF EUROPEAN OPERATIONAL RESEARCH SOCIETIES (EURO)

within the International Federation of Operational Research Societies (IFORS)

EURO-GOALS

In the belief that the purpose of Operational Research is to improve the well-being of people by improving the relevance and effectiveness of the institutions and organisations which serve them; that it seeks to do so by means of the rational methods of science exercised by representatives of diverse disciplines working together, each supporting the others; that this co-operation which respects no boundaries between disciplines should respect no boundaries between peoples; and that the Operational Research Societies of Europe should more closely co-operate one with another to further the theory and practice of Operational Research, the European Operational Research Societies established in 1975 the Association of European Operational Research Societies (EURO) within INFORS. The members of EURO agree to grant any fully paid-up member of any signatory body all rights and privileges as are offered by them to their own members, to exchange all appropriate information, e.g. bulletins, etc., to include relevant information from other signatories in their bulletin, etc., to inform other signatories of existing working groups and the dates and locations of their meetings, to open such working groups to individual members of other signatories, to organise European conferences on Operational Research and European working groups on topics which are felt to be important by the signatories, to encourage either individually or in concert the formation of Operational Research Societies in other European countries and to give such new bodies any possible help they may require.

EURO-OFFICERS

President:	Dominique de Werra, Département de Mathématiques, EPFL, CH 1015 Ecublens-Lausanne, Switzerland, *tel.* 41-21-472562
Past-President:	Bernard Roy, LAMSADE, Université de Paris-Dauphine, Place du Mal de Lattre de Tassigny, 75775 Paris Cédex 16, France, *tel.* 33-1-5051410 (2288)
President-Elect:	Jacob Krarup, DIKU, University of Copenhagen, Universitetsparken, DK-2100, Copenhagen, Denmark, *tel.* 45-1-396466
Vice-President:	Cristoph A. Schneeweiss, Universität Mannheim, Lehrstuhl für ABWL und UFO, Schloss - D 6800 Mannheim, Germany, Federal Republic, *tel.* 49-621-292-5413

Submission of an article for publication entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of $2.25, also through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.
